

Soludrip® Papayas

Soludrip® Papayas has three formulas that are specially designed to fulfill the plants' nutritional requirements in the following stages:

1 - Starter Stage

14-21-16

Application range: between 15 and 55 days after planting.

Phenology: adaptation, root growth, stem thickening, and new growing points.

2 - Foliar Development Stage

14-14-19

Application range: between 60 days and 10 months after planting.

Phenology: vegetative growth, flowering and fruit setting.

3 - Production Stage

12-10-25

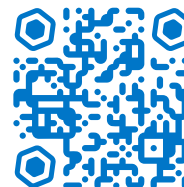

Application range: between 11 months after planting and the end of harvest.

Phenology: intense flowering and fruiting.

For better results use Just in Time® Plant Nutrient Calculator

Just in Time® is a user-friendly software tool that optimizes the application process of fertilizers and enables growers to calculate complete and balanced plant nutrition programs. Just in Time® calculates the dosage to apply in based on irrigation water volume and the frequency of the fertigation events in order to maintain the nutritional solution quality. Available for iOS and Android, Just in Time® does not need Wi-Fi connection.

Features:

- + Low salt index (SI).
- + Nutritional solutions with optimal pH between 5 and 6.5
- + Low electrical conductivity
- + 100% orthophosphate
- + Complete integral nutritional solution with ten correctly balanced essential elements
- + Allows to customize your irrigation system data according to its needs.

Our technologies are based on the principle of *Balanced Nutrition*, always considering inorganic nutrients, biostimulants, high-efficiency fertilizers, and their synergistic effect.

In addition to containing macronutrients —Nitrogen, Phosphorus, and Potassium—, these formulas include a carefully selected blend of micronutrients to optimize the root system and achieve the plant's maximum potential.
